

Simple Programs Using JavaScript

1.Sorting in descending order based on salary:

Output:

```
[
  { employee_name: 'Mani', salary: 40000 },
  { employee_name: 'Arun', salary: 20000 },
  { employee_name: 'Shiva', salary: 60000 },
  { employee_name: 'Sakthi', salary: 70000 }
]
salary sorted based on descending order area:
[
  { employee_name: 'Sakthi', salary: 70000 },
  { employee_name: 'Shiva', salary: 60000 },
  { employee_name: 'Mani', salary: 40000 },
  { employee_name: 'Arun', salary: 20000 }
]
```

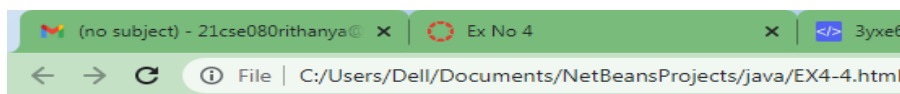

2.Removing all the numbers using regular expression:

3.Adding new! before string or returning the same string if it already starts with new!:

Output:
New! java
New! java

4. CSV to 2D array:

Javascript

Original string is "Twenty, Thirty, Forty, Fifty, Sixty"

The values of the Separated Array is: Twenty,Thirty,Fourty,Fifty,Sixty
